Estimates from public data for planning a conversation, not a survey and not an approval.

Tamarin, Mauritius · example drawn outline

Boundary drawn by you; not a cadastral survey.

Boundary & orientation

Area

500.81 m²

drawn

Mauritius measure

11.865 perches · 0.1186 arpents

drawn

Approximate conversion: 1 perche = 42.21 m²; 1 arpent = 4,221 m². Confirm the title's unit definition.

Perimeter

90.07 m

drawn

Shortest / longest side

20.02 / 25.01 m

drawn

First corner (WGS84)

-20.329216, 57.377679

drawn

North is up. Plan x = east; plan y = south. Dimensions use WGS84 local tangent metres, not map pixels.

Plan anchor

x 0.00 m · y 0.00 m

drawn

Applying a site does not move any existing room.

Levels & terrain

Lowest / highest input level

10.00 / 11.00 m

public data

Public composite orthometric heights; exact benchmark/datum transformation required for survey use

Best-fit slope

4.00% · 2.29°

public data

Least-squares plane; residual RMS 0.000 m. Local breaks may be steeper.

Downhill aspect

270.0° from north

public data

Public terrain

About 250 m cells

public data

Public terrain, about 30 m grid; not a survey. Native data can be coarser; neighbouring corners can share a cell. Never used for cut/fill or foundation depth.

Platform scenario

Platform level

Unavailable

unavailable

Cut / fill

Unavailable

unavailable

Supply survey points/contours or type what-if corner levels to calculate.

Sun & mapped surroundings

PVGIS annual solar yield

1,444 kWh/kWp/year

public data

1 kWp crystalline-silicon system; 14% losses, optimal orientation. Model estimate, not a roof shading or output guarantee.

PVGIS optimal tilt

16.0°

public data

Within 100 m of the boundary

Unavailable

unavailable

OpenStreetMap mapped ways, not addresses or a complete census. A road can consist of several ways. Missing data is not evidence of absence.

Waterways / power features

Unavailable

unavailable

Mapped public features only; buried services and connection capacity require utility confirmation.

Mapped land use nearby

Unavailable

unavailable

Planning conversation

Setback envelope

Unavailable

unavailable

No plot-specific planning rules verified. No buildable area or approval is inferred.

Illustrative buildable footprint

Unavailable

unavailable

No plot-specific planning rules verified. No buildable area or approval is inferred.

Sources & unresolved checks

Sources accompany every number. Boundaries and survey-plan transcription have not been checked against the cadastre. Confirm boundaries, datum, services, ground conditions and current planning rules with the relevant professionals.

Global GMTED2010 and SRTM terrain data courtesy of the U.S. Geological Survey.

This tile also contains GMTED2010 fallback, 250 m or coarser; exact contributing source at an individual pixel is not identified.

Exact terrain source headers: srtm/S21E057.tif, gmted/30S030E_20101117_gmted_mea075.tif

Report assembled: 2026-10-27T19:58:02.722Z. Each provider's original acquisition time is retained below; cached results are not relabelled as fresh.

Solar acquired: 2026-10-27T19:57:11.185Z. PVGIS 5.3 · radiation database PVGIS-SARAH3 · period 2005–2023.

Public terrain acquired: 2026-10-27T19:57:07.884Z.

Unavailable — context: Provider unavailable or timed out. Your boundary and saved report are retained.
